

Metrics of output and result indicators

Output indicators

Output indicator metric 1.1. Number of improved cultural and historical sites as a direct consequence of programme support (ENI/CBC 7).

Indicator name	Number of improved cultural and historical sites as a direct consequence of programme support
Measurement unit	Cultural and historical sites
Type of indicator	Output
Priority	Promotion of local culture and history
Definition	Number of cultural and historical sites being improved as a direct consequence of the support of the Cross-border Cooperation Programme Poland-Belarus-Ukraine 2014-2020. Valid for site improvements of e.g. buildings, landscapes, sites or structures of local, regional, or national significance, works of monumental sculpture or paintings, new acquisitions to collections or museums, etc. The improvements must be of a permanent nature.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 1.1 Number of crossborder cultural events organized using ENI support (ENI/CBC 8).

Indicator name	Number of crossborder cultural events organised using ENI support
Measurement unit	Number of events
Type of indicator	Output
Priority	Promotion of local culture and history
Definition	The number of crossborder cultural events, festivals, congresses on preservation of cultural heritage, etc. within e.g. music, theatre, other forms of arts, local culture, etc. <i>Crossborder event:</i> event involving participants from at least two ENI CBC participating countries. Participants may include either organisers or audience.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 1.2. Number of crossborder events organized using Programme support.

Indicator name	Number of crossborder events organized using Programme support
Measurement unit	Number of crossborder events
Type of indicator	Output
Priority	Promotion and preservation of natural heritage
Definition	<p>The number of jointly organized cultural events, educational meetings, congresses and preservation of natural heritage, etc. aimed at strengthening and further development of neighbourly cooperation in the promotion and protection of, among others, natural monuments, geological and physiographic formations, as well as natural sites or zones precisely delineated, having outstanding universal value, implemented under the Cross-border Cooperation Programme Poland - Belarus - Ukraine 2014-2020.</p> <p><i>Crossborder event:</i> event involving participants from at least two ENI CBC participating countries. Participants may include either organizers or audience.</p>
Measurement method	The final reports submitted by the beneficiaries including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 1.2. Number of promoted and/or preserved natural sites as direct consequence of Programme support.

Indicator name	Number of promoted and/or preserved natural sites as direct consequence of Programme support
Measurement unit	Number of natural sites
Type of indicator	Output
Priority	Promotion and preservation of natural heritage
Definition	<p>The number of objects belonging to the natural heritage, including, among others, unique formations of animate or inanimate nature, environment, endangered species of animals, plants and areas with a high value for nature conservation and aesthetic and / or scientific value, which have benefitted from subsidiary protection or have been promoted within the framework of direct support from the Cross-border Cooperation Programme Poland - Belarus - Ukraine 2014-2020.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 1.2. Number of persons participating in actions and awareness raising activities promoting preservation of natural heritage.

Indicator name	Number of persons participating in actions and awareness raising activities promoting preservation of natural heritage
Measurement unit	Number of people
Type of indicator	Output
Priority	Promotion and preservation of natural heritage
Definition	<p>The number of participants of jointly organized cultural events, educational meetings, congresses and preservation of natural heritage, etc. aimed at strengthening and further development of neighbourly cooperation in the promotion and protection of, among others, natural monuments, geological and physiographic formations, as well as natural sites or zones precisely delineated, having outstanding universal value, implemented under the Cross-border Cooperation Programme Poland - Belarus - Ukraine 2014-2020.</p> <p><i>Crossborder event:</i> event involving participants from at least two ENI CBC participating countries. Participants may include either organisers or audience.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 2.1: Total length of newly built (ENI/CBC 26).

Indicator name	Total length of newly built
Measurement unit	km
Type of indicator	Output
Priority	Improvement and development of transport services and infrastructure
Definition	<p>Identical with ERDF, CF and ETC Common Indicator no. 13. Length of roads (in kilometres) constructed by the project co-financed by the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020, where either:</p> <ul style="list-style-type: none"> - no road existed before; or - as a consequence of project completion, the capacity and quality of the previously existing local/secondary road is significantly improved to reach a higher classification (e.g. national road or equivalent); in this case the road cannot be counted under indicator nr ENI/CBC 27 ("Total length of reconstructed or upgraded roads").

Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 2.1: Total length of reconstructed or upgraded roads (ENI/CBC 27).

Indicator name	Total length of reconstructed or upgraded roads
Measurement unit	km
Type of indicator	Output
Priority	Improvement and development of transport services and infrastructure
Definition	Identical with ERDF, CF and ETC Common Indicator nr 14. Length of roads where the capacity or quality of the road (including safety standards) was improved as a direct consequence of the support. If the upgrade is significant enough for the road to qualify as new road, it will be counted under indicator nr ENI/CBC 26 ("Total length of newly built roads") and not under this indicator.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 2.1. Number of districts benefitting from modernized/created transport services and infrastructure.

Indicator name	Number of districts benefitting from modernized / created transport services and infrastructure
Measurement unit	Number of districts
Type of indicator	Output
Priority	Improvement and development of transport services and infrastructure
Definition	The number of districts that are the beneficiaries of the upgraded or newly established transport infrastructure, including network of roads, railways, inland waterways and other points of interconnection units. The indicator includes also transport services launched or improved under the Cross-Border Cooperation Programme Poland - Belarus - Ukraine 2014-2020, among others: international rail services, international transportation services etc.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.

Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.
----------------------	--

Output indicator metric 2.1. Number of partnerships established in order to modernize/create the environmentally friendly transport systems or services.

Indicator name	Number of partnerships established in order to modernize/create the environmentally friendly transport systems or services
Measurement unit	Number of partnerships
Type of indicator	Output
Priority	Improvement and development of transport services and infrastructure
Definition	The number of cross-border partnerships established in order to modernize/create the environmentally friendly transport systems or services. The indicator will include partnerships for the development of broadband, high-speed connectivity system, digital services support. <i>Cross-border cooperation</i> – cooperation between at least two institutions from the supported area, including one from Poland and one from Ukraine or/and Belarus.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 2.2. Number of partnerships established in order to develop the ICT.

Indicator name	Number of partnerships established in order to develop the ICT
Measurement unit	Number of partnerships
Type of indicator	Output
Priority	Development of ICT infrastructure
Definition	The number of cross-border partnerships established in order to develop the ICT, understood as a family of technologies processing, gathering and transmitting information in electronic form. The indicator will include partnerships for the development of broadband, high-speed connectivity system, digital services support. <i>Cross-border cooperation</i> – cooperation between at least two institutions from the supported area, including one from Poland and one from Ukraine or/and Belarus.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.

Output indicator metric 3.1. Population covered by improved health services as a direct consequence of the support (ENI/CBC 30).

Indicator name	Population covered by improved health services as a direct consequence of the support
Measurement unit	Persons
Type of indicator	Output
Priority	Support to the development of health protection and social services
Definition	<p>Population of a certain area expected to benefit from the health services supported by the project. It includes new or improved buildings, new equipment for various type of health service (prevention, outpatient or inpatient care, aftercare), or new or improved health service structures (e.g. telemedicine). The indicator excludes multiple counting at the project level even if the intervention includes several services targeting the same persons: one person still counts as one even if that person will benefit from improvement of several different services which were supported by the project.</p> <p>For example, an aftercare facility is developed in a city with a population of 100 000 inhabitants. It will serve half the city's population, thus the indicator value will increase by 50 000. If later a prevention service is developed in the same city that will serve the whole population, the indicator value will only increase by another 50 000.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 3.1. Population benefiting from the newly created or improved social services.

Indicator name	Population benefiting from the newly created or improved social services
Measurement unit	Number
Type of indicator	Output
Priority	Support to the development of health protection and social services
Definition	The number of people using social services, understood as: care centers for the disabled or sick, rehabilitation centers, the social housing bodies and youth care facilities, social welfare institutions and educational establishment, boarding schools and dormitories, medical and social care centers etc., created or modernized under the support of the Programme.
Measurement method	The final reports submitted by the beneficiaries including material and financial progress of the project.

Verification sources	Monitoring of projects. Quarterly information on the implementation of the Programme.
----------------------	---

Output indicator metric 3.2. Population benefiting from fire protection measures services as direct consequence of the support.

Indicator name	Population benefiting from fire protection measures services as direct consequence of the support
Measurement unit	Number of people
Type of indicator	output
Priority	Addressing common security challenges
Definition	<p>The number of people in the area of the operation of services benefiting from the support of the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020 aimed at protecting life, health, property and the environment from fire, natural disasters or other local threats through: the prevention from the spread of fire, ensuring manpower and resources to fight off fires, natural disasters and other local threats, conducting rescue operations.</p> <p>Area of the operation of services - understood as a defined extent of the terrain on which fire protecting services supported under the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020 conduct their operations.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 3.2. Number of security institutions cooperating across the borders.

Indicator name	Number of security institutions cooperating across the borders
Measurement unit	Number of security institutions
Type of indicator	Output
Priority	Addressing common security challenges
Definition	The number of national security institutions, such as fire brigade, railway security guards and police formations, among others, police, border guard etc., that have partnered across borders to increase the level of safety and protection of border areas.
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	Monitoring of projects.

	Quarterly information on the implementation of the Programme.
--	---

Output indicator metric 4.1. Number of border crossing points with increased throughput capacity (ENI/CBC 35).

Indicator name	Number of border crossing points with increased throughput capacity
Measurement unit	Border crossing point
Type of indicator	Output
Priority	Support to border efficiency and security
Definition	<p>The number of border crossing points with increased throughput capacity as a result of new or improved efficiency and security measures, improvement of infrastructure and/or equipment at the border crossing points, improvement of border management operations, customs and visas procedures, etc. Also includes newly constructed border crossing points.</p> <p>The increased capacity must be a direct consequence of the support. The crossing point must be located within the eligible area. However, improvements in only one side of that border are still improvements at the crossing point and should be included in the indicator. A crossing point implies in general the crossing points on both sides of a particular border and should be counted as one crossing point. Improvements at a particular crossing point resulting in improvements in throughput capacity for several modalities in parallel (e.g. both for road and rail) must still be counted as only one crossing point.</p> <p>Border crossing point: any crossing-point authorised by the competent authorities for the crossing of national borders. May include land (road & rail), sea, river, lake, or air border crossing points.</p> <p>Throughput capacity: the maximum number of transport units, persons or goods that can pass a point in a fixed time.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Output indicator metric 4.2. Increased throughput capacity of persons on land border crossing points (ENI/CBC 38).

Indicator name	Increased throughput capacity of persons on land border crossing points
Measurement unit	Persons/24 hours
Type of indicator	Output

Priority	Improvement of border management operations, customs and visas procedures
Definition	<p>The estimated additional increase of the throughput capacity of persons during 24 hours. The indicator measures the additional estimated theoretical maximum 24 h capacity and not actual flows of persons. The increase in capacity must be a direct consequence of the support. Increased capacity in two directions over a border should be reported as summated throughput capacity increase for the entire crossing point.</p> <p>Land border crossing point: any crossing-point authorised by the competent authorities for the crossing of national borders over land or fixed bridge. Ferry crossing points are hence excluded.</p> <p>Throughput capacity: the maximum number of persons that can pass a point in a fixed time.</p>
Measurement method	The final reports submitted by the beneficiaries, including material and financial progress of the project.
Verification sources	<p>Monitoring of projects.</p> <p>Quarterly information on the implementation of the Programme.</p>

Result indicators

Target values of result indicators should be achieved during the project sustainability period, ie. within a maximum of five years from its completion, according to the date indicated in the grant contract.

Result indicator metric 1.1. Increased number of visitors in the historical heritage and cultural sites.

Indicator name	Increased number of visitors in the historical heritage and cultural sites
Measurement unit	%
Type of indicator	Result
Priority	Promotion of local culture and history
Definition	Increased number of visitors in the historical heritage and cultural sites understood as an increase in the number of visits which occurs as a result of the project co-funded by the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020, which means an increase occurring in the time period between the year prior to start of the project, and the fifth year after the completion of the project.
Measurement method	<p>Monitoring the number of visits in places of historical and cultural heritage supported under the Programme.</p> <p>Information on the indicator achievement - reports of the beneficiaries of projects.</p>

Verification sources	Quarterly information on the implementation of the Programme. Monitoring of projects.
----------------------	---

Result indicator metric 1.2. Increased number of visitors in the natural heritage sites.

Indicator name	Increased number of visitors in the natural heritage sites
Measurement unit	%
Type of indicator	Result
Priority	Promotion and preservation of natural heritage
Definition	Increased number of visitors in the natural heritage sites understood as an increase in the number of visits which occurs as a result of the project co-funded by the Cross-border Cooperation Programme Poland-Belarus-Ukraine 2014-2020, which means the increase occurring during the interval between the year prior to the start of the project, and the fifth year after the completion of the project in the objects related to natural heritage.
Measurement method	Monitoring the number of visits in places of natural heritage supported under the Programme. Information on the indicator achievement - reports of the beneficiaries of projects.
Verification sources	The final reports submitted by the beneficiaries, including material and financial progress of the project. Monitoring of projects.

Result indicator metric 2.1. Decrease of travel/transportation time in the regions.

Indicator name	Decrease of travel/transportation time in the regions
Measurement unit	%
Type of indicator	Result
Priority	Improvement and development of transport services and infrastructure
Definition	Indicator understood as an average change of travel time between links in regions within the coverage of the Cross-border Cooperation Programme Poland-Belarus-Ukraine 2014-2020 after the implementation of the actions i.e. modernization or construction of selected transport sections, financed under the Programme.
Measurement method	Monitoring of the travel time on the selected travel links before and after the implementation of projects co-financed by the Cross-Border Cooperation Programme Poland-Belarus-Ukraine 2014-2020 using information technology tools. Reports of the beneficiaries, project documentation.
Verification sources	The final reports submitted by of the beneficiaries, including material and financial progress of the project. Monitoring of projects.

Result indicator metric 2.2. Increase in usage of ICT.

Indicator name	Increase in usage of ICT
Measurement unit	Districts
Type of indicator	Result
Priority	Development of ICT infrastructure
Definition	Indicator understood as an increase in usage of modern information and communication technologies in districts as a result of joint Polish-Belarusian and Polish-Ukrainian initiatives undertaken in the partnership financed under the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020, involving, among others, improvement of the quality of the existing ICT infrastructure, preparation of joint feasibility studies relating to the creation of broadband networks, joint implementation of broadband networks and joint initiatives on development of digital resources and data sharing.
Measurement method	A survey carried out among employees of public administration units (districts) related to the theme of ICT. Monitoring of the Programme. Project reports submitted by the beneficiaries.
Verification sources	The final reports submitted by the beneficiaries, including material and financial progress of the project. Monitoring of projects.

Result indicator metric 3.1. Enhanced access to health care and social services.

Indicator name	Enhanced access to health care and social services
Measurement unit	%
Type of indicator	Result
Priority	Support to the development of health protection and social services
Definition	Enhanced access to health care and social services understood as an increase in the number of inhabitants who may avail themselves of health care services and social services, implemented under the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020, as a result of joint cross-border initiatives relating to public health, stimulating cooperation against unemployment between the institutions and preventing the spread of diseases in humans and animals, providing increased access to health care and social services development.
Measurement method	Surveys with the representatives of districts who deal with issues of health and social welfare. Project reports submitted by the beneficiaries, project documentation.
Verification sources	The final reports submitted by the beneficiaries, including material and financial progress of the project.

	Monitoring of projects.
--	-------------------------

Result indicator metric 3.2 Reduction of waiting time for safety and security services response.

Indicator name	Reduction of waiting time for safety and security services response
Measurement unit	%
Type of indicator	Result
Priority	Addressing common security challenges
Definition	The indicator understood as a shortening of waiting time for safety and security services response (from the date of the notification to the response time) as a result of projects implemented in the framework of the Cross-border Cooperation Programme Poland-Belarus-Ukraine 2014-2020 involving the trainings, purchasing specialized rescue equipment, etc.
Measurement method	Statistics collected by the institutions/departments that have received funding from the Programme. Monitoring of projects.
Verification sources	The final reports submitted by the beneficiaries covering the material and financial progress of the project. Monitoring of projects. Programme monitoring data / statistics collected by the security organizations (police, fire service, customs).

Result indicator metric 4.1. Acceleration of passengers and cars border clearance.

Indicator name	Acceleration of passengers and cars border clearance
Measurement unit	%
Type of indicator	Result
Priority	Support to border efficiency and security
Definition	Acceleration of passengers and cars border clearance understood as reducing the time of border clearance of passengers and vehicles on the Polish-Ukrainian and Polish-Belarusian border crossings as a result of initiatives taken under the Cross-border Cooperation Programme Poland-Belarus-Ukraine 2014-2020 aimed at improving the operation of border crossings through their expansion, development of infrastructure, creation of a common visual identity systems, etc.
Measurement method	Measurement of the average time of processing passengers and vehicles on the Polish-Ukrainian and Polish-Belarusian border crossings, which have been improved by the projects financed under the Programme. Beneficiaries will be obliged to carry out such statistics.

Verification sources	<p>The final reports submitted by the beneficiaries covering the material and financial progress of the project.</p> <p>Monitoring of projects.</p> <p>Statistics collected by the Customs and border guards.</p>
----------------------	---

Result indicator metric 4.2. Increased efficiency of border clearance.

Indicator name	Increased efficiency of border clearance
Measurement unit	%
Type of indicator	Result
Priority	Improvement of border management operations, customs and visas procedures
Definition	Increased efficiency of border clearance understood as a reduction of the time of border clearance of passengers and vehicles as well as increased safety on the Polish - Belarusian and Polish - Ukrainian borders as a result of joint initiatives / projects undertaken under the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020.
Measurement method	<p>Measurement of the indicator is based on the average time of monitoring of border clearance and the number of detected cases of smuggling of goods at border crossings, for those who have obtained funding from the Cross-border Cooperation Programme Poland- Belarus-Ukraine 2014-2020.</p> <p>Beneficiaries of the projects will be obliged to carry out such statistics.</p>
Verification sources	The final reports submitted by the beneficiaries covering the material and financial progress of the project. Monitoring of projects. Statistics collected by the custom services and border guards.
